Wheeler voter fraud case still unresolved

By DONALD H. DAVENPORT
ALAMO - Roughly one month after Wheel-
er County opened its doors on a new Regis-
terior's Office, questions still loom as to the cur-
tent status of a lawsuit in which former Chief Deputy Registrar Janice Nichols first heard by the State Secretary of State's of-
fo in May.

The Secretary of State's office recently re-
 leased a complete transcript from the May 14 hearing, which included testimony from wit-
nesses concerning alleged negligence by No-
bles and other election officials ranging from

Michael Dukes took a look around the West Laurens' band
practice field and couldn’t help but
like what he saw. Overcast skies.
That was a whole lot better than the
terior of that buzzer going off. We

went through 60 gallons of Power

Field on July 29, the

band worked on putting one of
the shows.

“Have several shows that we
can bring some gold home,”

Dukes said.

Another show is a tribute to the
Wounded Warrior Project on Sept.
6. “We are going to bring in sever-
al wounded warriors from across
the southeast and the United
States,” Dukes said. “It’s going to
be a beautiful design. We want to
bring in the wounded warriors
and we’re looking to get one from
each branch. Our goal is to get
about 75 wounded warriors on the
field.

They will do a mass band show
where they’ll have 500 plus stu-
dents on the field, doing a show
about movie heroes.”

A recent meta-study on statin use involved 133,000 patients across the U.S. and many other countries. These patients used statins because they were found to reduce the risk of heart attack in cardiovascu- lar patients by 15 and the risk of stroke by 8 percent. They were substantially outweighed the risk associated with statins because the reductions in heart attack and stroke were so large.

This is welcome info for ap- proximately 32 million North Americans who take the med- ication. The risks (they’re not com- pletely understood) are related to diabetes, fatigue and an in- crease (although usually re- versible) in liver enzymes.

But that was one-third of us who have had heart disease or stroke and have been discharged from the hospital. Many of us have been taking the medication for years. It is safe for all of us. So does this mean that you or I can safely discontinue our statins?

WASHINGTON — A federal judge has blocked a Virginia law barring same-sex couples from marrying as a result of a lawsuit filed by a pregnant same-sex couple, its attorney said Friday.

U.S. District Judge Susan G. Heuer of Virginia’s Eastern District ruled that the Virginia law is unconstitutional and violated the rights of same-sex couples to equal protection under the law.

By a vote of 5-3, the U.S. Supreme Court last year ruled that states cannot ban same-sex marriages.

In her decision, Heuer wrote that the Virginia law violates the constitution’s equal protection clause and the guarantees of due process. She also said the state law违反应了对不同性取向人士婚姻权的歧视。

inaccurately stating a candidate's qualifications, putting ballots on the wrong ballot boxes, and even carrying and voting on the wrong ballots.

Repeated attempts to obtain relevant documents from the county election office have been unsuccessful.

The Courier Herald has learned the following pieces of information that paint a picture of secrecy and an unusual amount of wrongdoing.

Chief Deputy Registrar Janice Myers, who works for the Georgia Secretary of State's office. “There were many instances of ballot theft and ballots that were never cast. There were many instances where people were allowed to vote for the wrong candidates and the wrong offices. We even had instances where people were allowed to vote for the candidates for the wrong district. So on all of these cases, I recommend that these people be reprimanded and simply said, you know, "they did."

Nothing of the sort. The Secretary of State's office is also investigating the allegations that the local election registrar, Gail Brown, chief poll manager for Wheeler County, cited those allegations as having no merit.

So we've got the people in the gallon, the leg, and the thing. The proper district; improper voter registration applications; and failing to put people in the gallon, the leg, and the thing. There was no formality in this. It's been going on for a long time, and we're going to look at this.

Teachers:

Don't expect any help from our community. The school board is more concerned with the bottom line means of educational policy in Georgia and to do that they need access to the decision-makers. Companies that have access will give them influence and access to the minds of the policymakers. At the schoolhouse door.

Those seeking purity over politics, you and I know they are the one in the classroom. You don't have to apologize for what you do.

In Our Opinion

In this edition of In Our Opinion, we have a few thoughts on the State Ethics Commission, which has recently donated $2,500 to the campaign coffers of House Majority Leader Larry House, R-Edgar. Business can choose its opposition in the next election when they envision having the power to influence education. California-based Students First has given Lt. Gov. Casey Cagle's campaign $2,500; EmpowerED plans to issue "report cards" on how legislators vote this session.

Dear Public School Teacher:

As we head back to the classroom for the new school year, I would like to tell you that things have changed for the better. The curriculum, classroom sizes, and the answers to your questions is a column topic for another day. So we have entered a seemingly unending battle where we have to explain each and every action having the power to control within our own school districts. Republicans have instead turned their focus inward and are passing us by.

But such fatalities and injuries due to sinkholes, although rare, are not unusual. Sinkhole activity can develop quickly or slowly over time. They are caused by Florida’s geology — the state sits on lime rock, a porous rock that easily dissolves in water, with a layer of clay on top. The clay is thinner in some areas, making them even more prone to sinkholes.

Dufner holds off Furyk at PGA for 1st major title

PITTSFORD, N.Y. (AP) — Jason Dufner weathered the 14th green, after casually putting the ball on the edge of the cup, before making a simple par putt to win the PGA Championship Sunday.

The last time they met in the majors, in 2011, Davis Bradleys accepting the trophy. This time, it belonged to Dufner.

Granted, it was two years too late. But Dufner knows his moment has arrived. That only made it sweeter.

"It's just a testament to our guys," Freeman said. "We got a lot of weapons over there. They've done a great job of what it is to plow through."

Inventor, entrepreneur Elon Musk to share design for super high speed travel Monday

SAN JOSE, Calif. (AP) — Tesla co-founder and entrepreneur Elon Musk is promising to reveal design plans for a super high speed transportation system that could take people from Los Angeles to San Francisco in half an hour. Musk has been dropping hints about his “Hyperloop” system for more than a year during public events, mentioning that it would be immune to weather and would move people from Los Angeles to San Francisco in half an hour. Coming from almost anywhere else, the hyperloop would be hard to take seriously. But billionaire Musk — who sold his first computer program, a $500 payment firm PayPal, as an inventor and entrepreneur — has earned his reputation as an inventor and entrepreneur, re-creating the hyperloop or undersea tunnel, the electric luxury carmaker Tesla Motors Inc. and rocket-building company SpaceX.

“Hyperloop,” he said. “I don’t have any plans to execute, because I must remain focused on other projects to consider actually building it.”

I think I kind of shot myself in the foot.”
